

## Free eBook on the War Between Orthodox Medicine and Alternative Medicine

By Webster Kehr

This book digs deeper and presents the big picture of what is going on, why it is going on, and unravels far more of the maze of deception.

If you are interested in knowing more, here is the free eBook:

Chapter	Title
Chapter 1	<a href="#">Introduction To The War in Medicine</a>
Chapter 2	<a href="#">The Foundation Of The War in Medicine</a>
Chapter 3	<a href="#">Case Study of Scientific Corruption</a>
Chapter 4	<a href="#">Remission, Cure Rates and Other Deceptions</a>
Chapter 5	<a href="#">The Approval of Chemotherapy Drugs</a>
Chapter 6	<a href="#">The Scientific Evidence For Alternative Medicine</a>
Chapter 7	<a href="#">Cancer Research</a>
Chapter 8	<a href="#">Case Study of Media Corruption</a>
Chapter 9	<a href="#">How The Media and Establishment Brainwash The Public</a>
Chapter 10	<a href="#">Other Techniques the Media and Government Use</a>
Chapter 11	<a href="#">The Role of the FDA</a>
Chapter 12	<a href="#">The FDA Versus Freedom of Speech</a>
Chapter 13	<a href="#">Who Do You Believe - Follow The Money Trail</a>

### About the Author - R. Webster Kehr

R. Webster Kehr is a **bona fide** cancer researcher who has developed the following cancer treatments and made the following discoveries:

1) His model of how cancer forms at the cellular level is the most accurate model in history. Ron Gdanski, Dr. Alan Cantwell, Dr. Virginia Livingston, and others have done critical work in developing the individual pieces. Webster Kehr put all the pieces together, coupled with an understanding of mitochondria, and came up with a comprehensive model. An understanding of this model, and an understanding of the pleomorphic nature of microbes, is critical to an understanding of how to cure cancer. See:

[The Theory of Cancer](#)

2) He is the "father" of the concept of an "Overnight Cure For Cancer," whereby every cancer cell in a person's body can be reverted into a normal cell within 24 hours. This is a potential reality if a person understands what really causes cancer. In the 1930s, researcher Dr. Royal Rife cured cancer within minutes because he understood exactly what causes cancer. The American Medical Association offered many times to buy his technology (no doubt with the intent to "bury" the technology), but Dr. Rife refused to "sell-out." The FDA then stepped in and destroyed his equipment. The point is that that cancer can be cured very quickly if a person knows what causes cancer.

3) He figured out how melanoma and squamous cell carcinoma spread. At one time there was only one treatment for these two types of cancer, but now there are several very good cures for melanoma and squamous cell carcinoma.

4) He perfected and has pushed the concept of using chlorine dioxide transdermally (i.e. through the skin, using DMSO). This allows patients of cancer, Lymes Disease, AIDS, etc. to avoid having to waste a lot of time building up to a therapeutic dose. Many patients can never build up to a therapeutic dose. By using transdermal applications, patients can achieve a therapeutic dose on the first day of treatment. His experience with early "Overnight Cure For Cancer" treatments had taught him the technology to do this.

5) He developed the still experimental Brandt Grape Cure using Noni Juice and/or Mangosteen juice and/or Wolfberry juice (i.e. Goji juice) instead of grapes,

6) He has developed numerous modifications/improvements to alternative cancer treatments developed by others (which improvements are based on his understanding of how to avoid weaknesses in a treatment),

7) His Stage IV article is simply the best article on the Internet on the overall treatment of advanced cancer. See:  
[Treatment For Stage IV Patients](#)

8) He has developed numerous ways to combine, and make synergistic, two or more alternative cancer treatments, again based on his understanding of cancer.

At any given time, Mr. Kehr is researching several cancer treatments still under development. His research is state-of-the-art and is based on a clear understanding of how cancer forms.

He is the President and a member of the Board of Directors of the Independent Cancer Research Foundation, Inc., a non-profit corporation organized in the state of Nevada.
